

ENHANCED HEAT SINK

LUMINOUS INTENSITY DISTRIBUTION

At 160 lumens per watt, ThinkLite LED tubes are the most efficient in the industry and therefore use the least amount of energy in your retrofit applications. They are easily and safely installed in fluorescent fixtures by simply bypassing the ballast and inserting the tube into the existing shunted or non-shunted sockets. The T5 line is available in several wattages, shapes and lengths. With its high efficacy, it is ideal for reducing the number of tubes used per fixture (delamping).

FEATURES

- Proprietary driverless LED technology
- Reduced energy consumption by 50%
- Vibration and impact resistant
- Longer lifespan (65,000 hours)
- 5 year warranty
- No harmful UV rays
- Instant on / off

CERTIFICATIONS

SPECIFICATIONS

Input Voltage:	85V - 277V
Input Frequency:	50Hz - 60Hz
Lumen Efficacy:	160 LM/W
Wattage & Light Output:	7W: 1,120 Lumens
Power Factor:	>0.99
Socket:	G5
Kelvin Options:	6000K
Beam Angles:	150°
CRI:	93+
Lumen Maintenance:	95% at 65,000 hours
Operating Temperature:	-35°C to 55°C
